

LKV-PUC01

PS/2-to-USB Adapter for USB Mouse and Keyboard

Quick Installation Guide

The LKV-PUC01 PS/2-to-USB Adapter is a small yet reliable conversion device to adapt your USB keyboard and mouse for PS/2 style computer. It is especially useful when you still have to use an older PS/2 style PC which offers no USB interface for your USB keyboard and mouse.

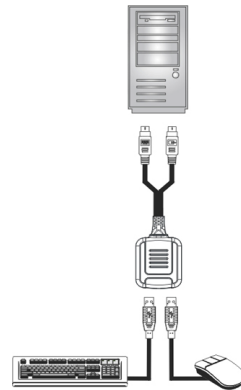

LKV-PUC01

which in turn should then be connected to the computer while it is on powered-off state. Don't connect the adapter with keyboard and mouse while your computer is still powered on.

Step 2. Connect the PS/2 Keyboard connector and the PS/2 mouse connector each to the PS/2 keyboard port and the PS/2 mouse port of your computer.

Step 3. Power up your computer. Once the computer is powered up, you can manage it either through the local console and/or the remote console.

Configuration Diagram

Features

- ◆ Provides two additional USB ports for your USB keyboard and mouse
- ◆ PS/2-to-USB interface conversion
- ◆ PS/2 style keyboard and mouse control
